

# :mini

## A simple, cost-efficient multi-camera sync solution

Super compact and incredibly versatile, the :mini trx+ timecode generator works just as well on a DSLR as a more traditional large scale film and broadcast camera.

- Timecode, genlock & word clock
- Zero drift between units using long range B:LINK RF
- Ultra compact and lightweight
- Flexible mounting
- DSLR compatible
- B:LINK enabled for wireless control using B:LINK Hub

## B:LINK HUB

Production dashboard & device control hub

Accessed from any smartphone, tablet or computer, from this simple dashboard users can remote view, monitor and control multiple Timecode Systems units and any compatible cameras and sound recorders from their device. This offers unrivalled capability to centrally sync video and audio timecode in even the most complex multi-camera set-ups.

- Access using the :wave or :pulse
- Compatible with any smartphone (iOS or Android), tablet, Mac® or PC
- View, monitor & control all B:LINK Enabled Timecode Systems devices
- Record start/stop & control compatible cameras and sound recorders
